

2.3 Calculator Practice, Part 1

This worksheet will be a bit different from the others. Before you start it, watch the playlist in which we'll talk about how to do all of the basic operations on your calculator. Follow along in the video and then try the problems below. Make sure to check your answers and to re-do the problems until you can get them all right.

Here is the playlist:

If you need to round any of the answers, round them to two decimal places.

1 Find $5.3 + 2.9$

2 Find $3 \cdot 34$

3 Find $2.3 - 8.982$

4 Find $(-34) + 102$

5 Find $\frac{23}{13}$ as a decimal.

6 Find $\sqrt{37.81}$

7 Find $4.9^{4.3}$

8 Find $\sqrt[3]{13}$

9 Find the sum of $\frac{17}{\pi}$ and the answer to the last problem. Use the “ans” key to help you find your answer.
